

One house for *every* guest.

Direct bookings paid by UPI, a restaurant that runs itself, and one calm app for the whole stay — all on your own beautifully designed website.

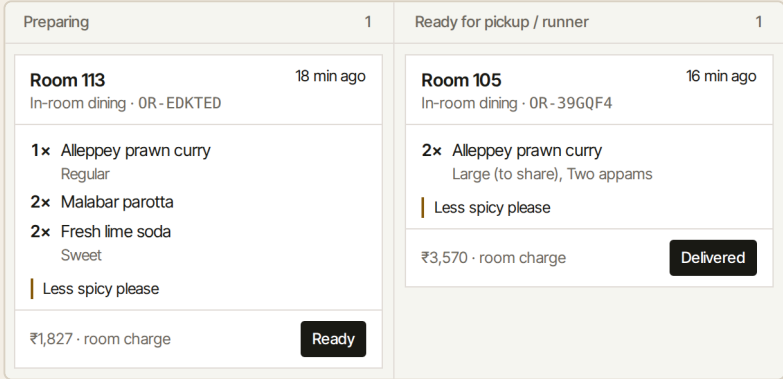

01 Direct booking, paid by UPI

Guests pay straight to **your own UPI ID** — your team approves the reference in one tap. Or switch on a UPI gateway. Booked direct, so no OTA commission.

02 A restaurant that runs itself

Table bookings with no double-seating, orders to the room, pool or beach, and a live kitchen screen — charged straight to the room bill.

03 One app for the whole stay

Towels, repairs, late check-out, airport pickups, spa and the bill — requests reach the right team with a clock on every one. Installs from the browser; works on weak Wi-Fi.

04 Your website, your domain

Ten designed templates — coastal to heritage palace. Edit on the page, publish in a click, roll back any time. Switch modules on only when you need them.

Open your first property *this week.*

For hotels, resorts, villas and boutique stays across India — one workspace per property, every team on the same page.
